GAS, ELECTRIC AND WATER SUPPLY STATISTICS.

Annual returns for the year ended June 30, 1920, have been received from fifty-eight gas, fifty-five electric and forty-eight water supply corporations, seven persons, associations or manufacturing companies doing a gas or electric business, and one educational institution supplying water commercially; also, for the fiscal year 1919, from forty municipalities doing a gas or electric lighting business.

The following compilations of statistics are from these several returns:—

GAS COMPANIES.

The following table shows the corporate names and capital stock of the gas companies in active operation, and the names of the persons and corporations other than gas companies making and selling gas, on the thirtieth day of June last, with the localities supplied and the population of each according to the census of 1915. Unless otherwise noted the par value of each share of capital stock reported is \$100.

Five 1 of the companies appear not to have earned expenses, and thirteen 2 have not earned sufficient to warrant the declaration of any dividend.

The receipts from gas sold by meter show an increase of \$2,954,940.47. The receipts from sales for public lamps have increased by \$3,585.62.

In Appendix B will be found, under date of June 30, 1920, the separate balance sheets, profit and loss and manufacturing accounts of the gas companies, as taken from the annual returns, with corrections made by the Department after their examination and correspondence with the officers of the several companies.

The valuation of the property of the several companies as fixed by the local assessors may be found in detail in Appendix E. The aggregate valuation of all the companies is \$82,532,417.

Certain companies, however, have electric light plants, and the assessed value of such, whenever separately returned, is as follows:—

Amherst, .			\$254,700	Suburban (Revere),		\$701,105
Easthampton,			75,629	Cape and Vineyard,		364,340
Fitchburg,	. '		1,190,064	Webster,		489,696

Lynn, .			2,161,218	Total, .	\$1	0,757,983
New Bedford,			3,981,071			

¹ Fourteen last year.

² Eight last year.

The value of the gas plants as assessed by the local assessors is, then, in round numbers, probably not far from \$62,000,000, as there are electric plants at Adams, Athol, Beverly, Blackstone, Charlestown, Clinton, Marion, Nantucket, Newburyport, North Adams, Spencer and Williamstown, which are not given in the last table.

The total sum paid by the companies for taxes, including State supervision, after apportioning to electric account that part of the gas companies' taxes belonging to their electrical departments, was \$2,032,009.48, an average of 8.6 cents per thousand feet of gas sold; being an increase over the amount paid the previous year of \$199,165.32 in the total, and of two-tenths of a cent for every thousand feet sold.

Dividends.

The amount paid in dividends by the several companies, the rate and amount per thousand feet of gas sold, will be found in detail in Appendix E. Thirteen companies paid no dividends. The 46 companies paying dividends paid out in all for this purpose the sum of \$3,811,886.21, which is an average rate of 7.93 per cent on their capital stock.

Six¹ of the corporations included above appear not to have earned expenses, and six² have not earned sufficient to warrant the declaration of any dividend.

From the above data it appears that the gross profits from sale of electricity by all the companies increased \$2,410,296.89, and those doing only an electric business show an increase during the last year of \$1,866,503.76.

In Appendix B will be found, under date of June 30, 1920, the separate balance sheets, profit and loss and manufacturing accounts of the companies, as taken from the annual returns, with corrections made by the Department after examination and correspondence with the officers of the several companies.

The valuation of the property of the several electric companies, as fixed by the local assessors, may be found in detail in Appendix F. The aggregate valuation of all of the electric companies is \$92,780,861. This does not include the valuation of the electric plants of the gas companies. The total sum paid by the companies for taxes, including State supervision and including the amounts paid by the gas companies on account of their electric plants, is \$3,654,002.36.

Prices.

A number of the water companies do not meter water consumed by their customers, but base their charges upon the character of the premises or fixtures supplied. The two following tables set forth the schedules in force on June 30, 1920, first, of those companies charging meter rates, and second, of those whose prices are based on other factors, so far as it is practicable to tabulate them in view of their number and variety:—

MUNICIPAL OWNERSHIP.

Official replies to inquiries relative to action about a municipal gas or electric lighting plant have been received from 192 towns and cities, including all the cities and substantially all the towns in which the population exceeds 1,500 and in which no such action had previously been taken. Except as stated on page 112 none of these have taken action during the year.

Pages 100 to 111 contain a tabular statement intended to show briefly all action within the State in respect to the municipal ownership of gas or electric light plants prior to 1920. The pages following contain abstracts from the reports of town officers, showing, in two sections, the history of this subject during the last calendar year. The first section (page 112) exhibits the action of those towns which are not engaged in the lighting business, but have during the year considered propositions to undertake it. The second section relating to municipal plants in actual operation (pages 113 to 132) sets forth certain general financial and physical data relative to the plants from the returns made to the Department for the fiscal year 1919. Appendix H contains detailed statistics relative to the municipal plants, compiled from the annual returns for the fiscal year 1919.

Propositions considered in 1920.

Holbrook. — At a special meeting on December 27 it was voted, 40 in the affirmative, 6 in the negative, "That the town acquire, by purchase or otherwise, a plant for the distribution of electricity for municipal use and for the use of the inhabitants of the town of Holbrook, in accordance with the provisions of section 3 of chapter 742 of Acts of 1914, and any other acts in addition or supplementary thereto."

It was also voted that "whereas there is now an existing privately owned plant partially within the town of Randolph and partially within the town of Holbrook, adapted to serve both towns, and whereas the portion of the plant in the town of Holbrook could be more advantageously operated if kept joined to the portion of the plant in the town of Randolph, and whereas the town of Holbrook is desirous of entering into an agreement with the town of Randolph for the joint purchase and maintenance by the two towns of said plant; now, then, the selectmen are hereby appointed and authorized as a committee for and in behalf of the town of Holbrook to act in conjunction with a similar committee to be appointed by the town of Randolph in procuring such legislation as may be necessary and proper to authorize the joint purchase, maintenance and operation by said towns of a municipal lighting plant."

Lunenburg. — At its annual town meeting on March 1 the town voted a second time to sell its electric lighting plant, the vote being 79 in favor of selling and 9 against the sale. On May 31 the plant was sold to the Fitchburg Gas and Electric Light Company, which now supplies electricity in the town.

Russell. — At a special meeting on Dec. 30, 1919, the town voted unanimously, as follows: —

That the town construct, establish, purchase and maintain within its limits, and particularly in the limits of Russell Village, one or more plants for the manufacture and distribution of electricity for municipal use, or for the use of the inhabitants of said town or village; said plant or plants to include suitable land, crossings, structures, machinery and other apparatus and appliances for manufacturing, using and distributing electricity for said purpose, all in accordance with and subject to Acts of 1914, chapter 742.

At an adjournment on March 8 of the annual town meeting, a second unanimous vote in favor of the acquisition of such a plant was passed, and it was also voted to authorize \$11,000 in bonds or notes for the purpose of establishing such plant. The plant began its operation on July 1, purchasing its current of the Westfield River Paper Company.

Worcester. — On June 7 and July 6 there was appointed a special commission, consisting of members of the city council and three citizens, to "consider and report to the city council as to the advisability of the construction, purchase or lease and maintenance by the city of Worcester, of a plant for the manufacture and distribution of gas for municipal use and the use of its inhabitants."

MUNICIPAL STATISTICS.

The following table contains the names of the municipalities operating lighting plants on Dec. 31, 1919; the population of each, according to the census of 1915; the kind of supply and the year when the same was begun; the amount invested in the plant since the inception of the enterprise, including that raised by loans and by direct taxation; the total valuation of all estates in town for the year of the return, and the amount per thousand of valuation raised by taxation for all purposes.

APPENDIX D-MUNICIPALITIES.

Balance Sheets, Operating and Profit and Loss Accounts for Municipal Fiscal Year 1919.

Chapter 78 of the General Acts of 1918 (now section 63 of chapter 164 of the General Laws) amended the law relative to the annual returns of municipal lighting plants by substituting the city or town's fiscal year for the year ending June 30. The calendar year is now the fiscal year of all towns and of many cities. In the balance sheets, etc., which follow, the year is the calendar year 1919 unless otherwise indicated.

In these balance sheets the various plant assets represent the actual expenditures for these items, less depreciation charges; and the item "cash" includes the cash in the hands of the manager and the available unexpended balances of all appropriations except for depreciation fund; that is to say, all appropriations, when they become subject to drafts by the manager, are treated as cash. Under the title of "appropriations for construction" are included all those amounts which have been raised directly by taxation for new construction since the inception of the enterprise. When, as has frequently been done, the appropriation has by its terms been applicable, either to construction or maintenance, at the option of the management, only the amount actually expended for new construction and charged to the construction accounts has been treated as an "appropriation for construction." The "appropriations for construction" and outstanding debt and current accounts payable are grouped as representing the direct liability of the plant. In the item "loans repayment account" may be found the aggregate amount provided from the revenue of the plant and applied to the retirement of debt. In accordance with the requirements of law the payment of maturing debt or contributions to sinking funds are treated as current expense by appropriate debits to "profit and loss" and credits to "loans repayment account." Operating expenses and income from sales of gas or electricity are reported on the basis of expenses incurred and income earned.

Table 12. — Public Gas Lamps.

The following table shows the number of street lamps supplied June 30, 1920, the net increase or decrease during the year, the average price per thousand feet received for gas used in such lamps, and the cost per thousand feet for the care of the lamps where this is done by the companies: -

Table 13. — Analysis of Reported Income and Expenditures of the Larger Companies.

The following tables give an analysis, on the unit basis of 1,000 feet of gas, of the income, expenditures and surplus earnings of all the gas companies making or selling more than 100 million feet of gas during the year, as stated by the companies in their returns. Of these companies, the Beverly Gas and Electric Company. Charlestown Gas and Electric Company, Fitchburg Gas and Electric Light Company, Lawrence Gas Company, Lynn Gas and Electric Company, New Bedford Gas and Edison Light Company, North Adams Gas Light Company, Suburban Gas and Electric Company, Webster and Southbridge Gas and Electric Company and Holyoke Municipal Plant sell electricity as well as gas: consequently, the total income, dividends, interest, other general expenses and undivided earnings cannot fairly be stated on the gas unit basis. The analysis of the expenses of manufacturing is stated on the basis of the gas made. This basis is adopted in deference to the provisions of section 3 of chapter 422 of the Acts of 1906, requiring the annual publication of certain similar information relating to the Boston Consolidated Gas Company. The table printed on page 431 gives the amount of capital of each of these companies per 1,000 feet of gas sold; and the tables on pages 425 and 428 give the respective amounts of gas made, bought and sold during the year.

Table 8. — Fuel Statistics — Concluded.

Analysis of Reported Income and Expenses of the Larger Companies, as shown in Table 9.

The following tables give an analysis, on the unit basis of kilowatt hours of electricity sold, of the income, expenses and surplus earnings of all the electric companies making or purchasing more than 10,000,000 kilowatt hours of electricity during the year, as stated by the companies in their returns. The analysis of the expense of manufacturing electricity is computed on the kilowatt hours made, as a fairer basis for comparing such cost. In the kilowatt hours sold are included all electricity supplied to the street light circuits measured at the switchboards of the several companies. Of the companies included in this table, the Athol, Fitchburg, Lawrence, Lynn, New Bedford, Newburyport, Webster and Holyoke Municipal Plant sell gas as well as electricity; consequently, the net income available for dividends, interest, other general expenses and undivided earnings cannot fairly be stated on the kilowatt hour unit basis.
